POPULAR WOODWORKING MAGAZINE June 2010

Highly Recommended

In a world of marking knives with turned handles, the Back Channel Marking Knife stands out as an excellent alternative with some great features.

The handle is a tapered octagon, which makes it easy to determine when the blade is square to the work. The knife has a sheath with a magnet embedded in it, so your blade will always be protected. But most of all, the knife is comfortable to use, extremely thin and reaches into the tightest spaces and largest dovetails. It is a fantastic tool and is available at Di legno Supply (dilegnosupply.com or 877-208-4298) for \$49.95.
